

Printing Process

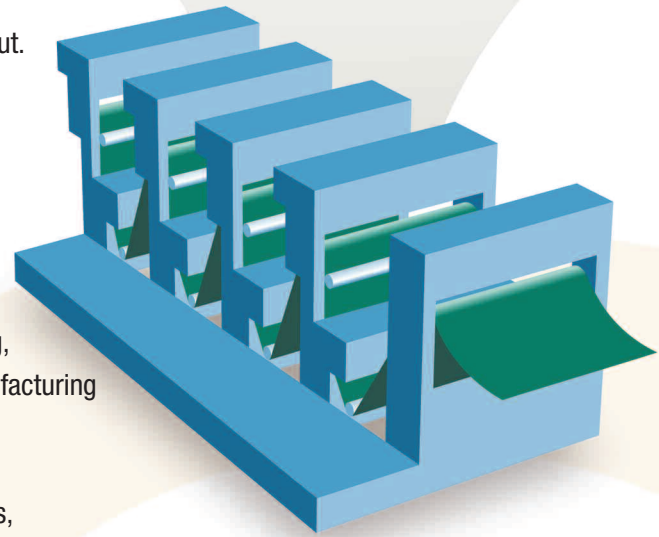

Fabrico offers a broad range of printing capabilities, from basic one-color applications to intricate, four-color designs. State-of-the-art equipment enables multi-step manufacturing, optimizing efficiency and minimizing production costs. Strategic alliances with world-class vendors support an extensive selection of innovative materials. ISO-9001:2008 processes ensure high quality of output.

Advanced Printing Capabilities

Printing services range from one-color printing to four-color or four matched colors, on materials with thicknesses ranging from 0.001" to 0.015" and widths up to 13". Two sided printing is also available.

In-line capabilities are ideal for multi-step applications that require laminating, rotary die-cutting, or sheeting. Combining printing processes with other manufacturing steps reduces set-up time and production costs.

Materials include both pressure-sensitive and non-pressure-sensitive varieties, with applications ranging from tamper-evident labels for the medical market to high durability labels for harsh environments.

Knowing When to Use Fabrico's Printing Services

Q) Do you need a variety of file prep options?

Fabrico's printing machines are both Mac- and PC-compatible, and accept all standard printing applications. Fabrico also has the capacity to create artwork files in house.

Q) Do you need multi-color printing?

Fabrico offers four-color printing or four matched colors using water-based or UV-cured ink.

Q) Are you printing on custom materials?

Fabrico can print on a wide variety of materials, including laminates, tapes, and foams. Specialized embossing, hot or cold foil stamping, mirror imaging, or UV coating are also available.

Q) Do you need custom finishing options?

Fabrico supports roll-to-roll label rewinding, fan folding, and sheeting finishing options.

FABRICO™
A DIVISION OF EIS

Materials

Fabrico has long standing relationships with world-class providers of innovative materials. These relationships ensure the widest selection of materials at the lowest cost. The following materials may be used in Fabrico's printing processes:

Label Types
Adhesive label stock Tamper-evident

Pressure-Sensitive and Non-Pressure-Sensitive Materials	Brands
Papers	3M™ Avery Dennison® DuPont® Nomex® MacTac Raflatac™ Spinnaker Coating
Films	3M Avery Dennison DuPont Kapton® DuPont Teijin® Flexcon ITW Formex MacTac Mobil™ Raflatac Spinnaker Coating
