

FABRICO DELTA PRESS

Rotary Press Overview

- Thin material under 0.001"
- Thick material over 0.015"
- Part size over 6 square inches
- Tolerances: +/- 0.005" – +/- 0.015"

Delta Rotary Press Specifications

- Materials: Films, Paper, Adhesive Label Stock, Tag Paper, foam, rubber, foils
- Die Stations: 6
- Servo drive flexo press
- Base Material Unwinds: 1
- Lamination Stations: 4
- Printing: 1-Color water based or UV cured ink
- Capabilities
 - Material Width: 13"
 - Material Thickness: 0.001" – 0.015"
 - Maximum Speed: 500 fpm
 - Maximum Part Length: 22"
 - Rewind product into rolls (max 16" Diameter) or sheet-and-stack
 - Electronic web tension control system for precision registration
 - Re-registration of material
 - Precision die cut part placement for material economy
