

Fabrico Converts Flexible Materials Critical for Medical Products

Kennesaw, GA, USA – Fabrico, the leader in design and manufacturing services for flexible materials, provides specialty materials, engineering, and manufacturing services for medical products ranging from IV site and wound care to medical devices and disposables. Using a fully-equipped Class 7 (10,000) clean room, Fabrico converts materials such as electrical grade papers, films, coated cloths, laminates, and tapes for the most demanding medical applications.

Fabrico has an extensive manufacturing capability that ranges from die cutting and slitting to more complex laser and water jet cutting for intricate patterns and materials. Through its extensive supplier network, Fabrico has access to a broad range of materials, as well as decades of material design expertise from leading suppliers. In fact, Fabrico is a Preferred Converter for 3M products.

Some of the materials Fabrico custom converts include diagnostic test strips and carrier frames, composite wound care dressings, die-cut medical grade foam tape, bio-compatible pressure-sensitive adhesive tapes (both woven and non-woven), and hypoallergenic adhesive tapes for cosmetic applications. Fabrico also provides printing services for tamper-evident and custom pressure sensitive labels used on various medical products.
