Fabrico Custom Designs and Converts Materials for Safety Goggles

Kennesaw, GA – Fabrico, the leader in design and manufacturing services for flexible materials, announces its capabilities for designing and converting safety goggle component materials. Fabrico offers in-house design capabilities that enable custom solutions while maximizing cost-effectiveness and production efficiency. This expansion of capabilities is part of Fabrico’s ongoing dedication to providing customers with the highest level of products that meet their individual needs.

Fabrico converts a wide variety of materials, including adhesives, foams, rubbers, and laminates from leading materials suppliers, to create goggle components such as lenses, lens assemblies, and lens covers. Materials include clear plastic and foam pieces that are cut using precision die-cutting or the high-powered water jet cutter, as well as thin adhesives that are laminated to other materials and clear flexible materials that are custom die-cut. Fabrico has also been instrumental in creating design solutions for tear-away lens covers that protect goggle lenses from becoming scratched or dirty during use.

<continued>

Fabrico has in-house design services as well as in-line processes, saving customers both time and cost during the overall production process. For example, Fabrico laminates thin, double-sided, pressure-sensitive adhesives to a variety of other materials, eliminating cleanup, curing time, and equipment maintenance associated with liquid adhesives.

##

About Fabrico

Fabrico is the market leader in design and manufacturing services for flexible materials. By focusing on its customer's needs, Fabrico has developed a track record of solving unique challenges and providing sound customer solutions. Fabrico is headquartered at 4175 Royal Drive, Suite 800, Kennesaw, GA 30144; Tel: 678-202-2700; Fax: 678-202-2702; E-mail: info@fabrico.com; Web: www.fabrico.com.
